Sustainability

Humanitarian Projects

Project planning

Describe the community needs that your project will address.

The 7.7 and 7.6 magnitude earthquakes centered in Kahramanmaraş on February 6, 2023 deeply shook the whole of Turkey. As a result of the earthquakes felt in 11 provinces around the Eastern Anatolian fault line and causing heavy damage, significant risks to public health and the environment have arisen. One of the most important factors is the construction debris. When these wastes mix with nature or water bodies, they directly or indirectly cause serious damage to water resources and then to nature.

How did your project team identify these needs?

In addition to waste causing water pollution, Hatay Metropolitan Municipality Mayor Assoc. Dr. Lütfü Savaş states that due to the effect of the earthquake, there were breaks in the main lines, therefore water resources were lost and the wells dried up (Oda TV News). According to the same news report, earthquake victims in Hatay expressed their problems with water, saying that they had to commute for kilometers and wait in long queues to access clean water. In addition, locals indicated that the water aid they received was not sufficient, and that there was also a hygiene problem caused by lack of water.

As a club, we examined and determined this need on site and decided to apply for this project.

How were members of the benefiting community involved in finding solutions?

Antakya is the largest district and center of Hatay province and the Asi River passes through the middle. According to records, it has a population of 389,377. The aim of our donation is to economically store the purified drinking water reaching the Antakya region, thus ensuring that the people of the region have constant access to clean water, and to ensure that the decreasing water resources are not wasted by reducing leakage and water loss. As a result of the project, approximately 3000 people will benefit from the water tank to be installed in the region.

How were community members involved in planning the project?

Within the scope of the project, our club will only ensure the transportation of equipment and this equipment to the region. Burying the warehouses underground and connecting them to the existing network will be provided by Antakya Municipality. In addition, periodic maintenance of the warehouses will be provided by the municipality.

Project implementation

Summarize each step of your project's implementation.

Do not include sensitive personal data, such as government ID numbers, religion, race, health information, etc. If you include personal data, you are responsible for informing those whose personal data is included that you are providing it to Rotary and that it will be processed in accordance with Rotary's [Privacy Policy](#).

#	Activity	Duration
1	Preparing the required machine and equipment technical specs.	7 days
2	Collecting proposals from possible subcontractors (vendors/suppliers)	7 days
3	Deciding on the subcontractor by constituted procurement committee	2 days
4	Production and Installation of the equipments and machinery	6 weeks
5	Running the facility by the trained staff, testing and final tuning	2 weeks

Will you work in coordination with any related initiatives in the community?

Yes

Briefly describe the other initiatives and how they relate to this project.

Antakya Municipality will be responsible for its integration into the existing the pipe connections from the source water. In addition, the annual periodic maintenance and operation of the water tank will be carried out by the municipality.

Please describe the training, community outreach, or educational programs this project will include.

No training will be needed

How were these needs identified?

No training will be needed

What incentives (for example, monetary compensation, awards, certification, or publicity), will you use, if any, to encourage community members to participate in the project?

There is no any incentives

List any community members or community groups that will oversee the continuation of the project after grant-funded activities conclude.

Ercan Akdoğan- 2023-24 President

Melih Aşıcı- 2024-25 President

Mert Özmut- Rotary foundation committee chair of Ankara Bahçelievler RC.

Budget

Will you purchase budget items from local vendors?

Yes

Explain the process you used to select vendors.

Collecting the quotations from 3 different vendors and bargaining to obtain the best quality at lowest price.

Did you use competitive bidding to select vendors?

Yes

Please provide an operations and maintenance plan for the equipment or materials you anticipate purchasing for this project. This plan should include who will operate and maintain the equipment and how they will be trained.

The annual periodic maintenance and operation of the water tank will be carried out by the municipality

Describe how community members will maintain the equipment after grant-funded activities conclude. Will replacement parts be available?

The annual periodic maintenance and operation of the water tank will be carried out by the municipality

If the grant will be used to purchase any equipment, will the equipment be culturally appropriate and conform to the community's technology standards?

Yes

Please explain.

The 7.7 and 7.6 magnitude earthquakes centered in Kahramanmaraş on February 6, 2023 deeply shook the whole of Turkey. As a result of the earthquakes felt in 11 provinces around the Eastern Anatolian fault line and causing heavy damage, significant risks to public health and the environment have arisen. One of the most important factors is the waste of construction debris. When these wastes mix with nature or water bodies, they

cause serious damage to water resources directly or indirectly.

Chamber of Environmental Engineers Istanbul Branch Manager Medet GÜNEY states that they subjected the sample waters they took from the earthquake zone to chemical and biological analysis and as a result, they did not meet drinking water standards. (BBC, A. Yazan) If safe water cannot be supplied to the earthquake area, the risk of waterborne dysentery, Hepatitis A, typhoid and diarrheal diseases is very high.

In addition to waste causing water pollution, Hatay Metropolitan Municipality Mayor Assoc. Dr. Lütfü Savaş states that due to the effect of the earthquake, there were breaks in the main lines, therefore water resources were lost and the wells dried up. (Oda TV news) According to the same news, earthquake victims in Hatay expressed their problems with water, saying that they had to come for kilometers and wait in long queues to access clean water in line with the aid received, that the water aid received was not sufficient, and that there was also a hygiene problem due to lack of water.

After the project is completed, who will own the items purchased by grant funds? No items may be owned by a Rotary district, club, or member.

All drinking water tanks and equipments will be owned and maintained by Antakya Municipality.

Funding

Does your project involve microcredit activities?

Have you found a local funding source to sustain project outcomes for the long term?

Yes

Please describe this funding source.

The annual periodic maintenance and operation of the water tank will be carried out by the municipality

Will any part of the project generate income for ongoing project funding? If yes, please explain.

no
